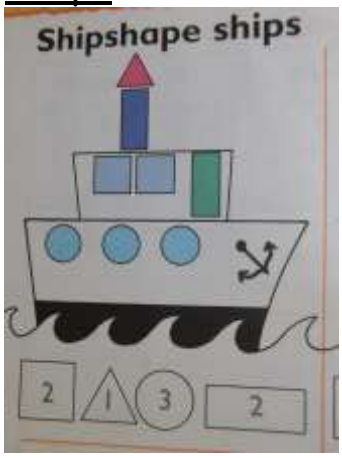
8th June 2020 <u>Things to try this week:</u>

Shape



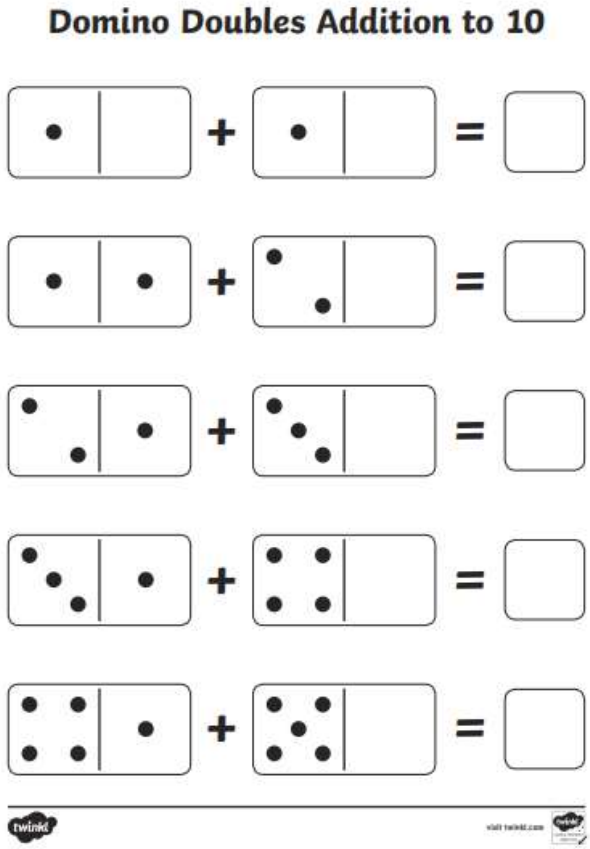
Draw around shapes you find at home to create your own shipshape ship. Talk about the shapes you are using.

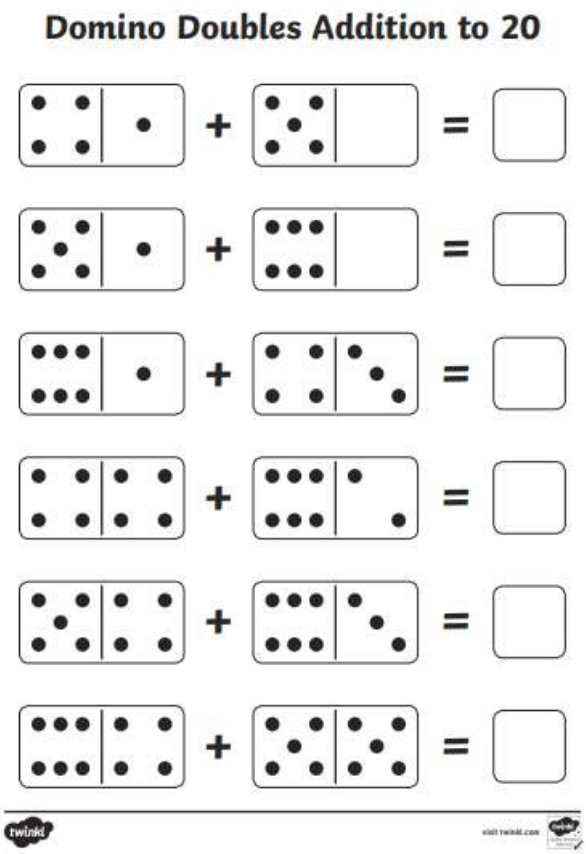
You could also use boxes and cans. But remember these will be 3D shapes! Cylinders, cubes, cuboids, spheres and pyramids.

Number

- Play dominoes with a partner. (If you don't have any you can make some)

- Show your partner a domino and they have to add up all the dots
  4 and 3 equals 7. The aim of the game is to look at the domino and shout out the total without counting. This will help you practise mental maths.
- Reception dominoes to 6
- Year 1 dominoes to 12 (or 20 if you can make all the combinations.)
- How many dominoes in a pack if there is a maximum domino of double 8?





Science

Don't forget you can build your bridges inside or out.
Remember to wash your hands after playing outside.
Take a photo of your finished bridge and send it to jessons@hwbmail.net and I will put them on the website.

Have fun and stay safe!
