

How can I make new friends?

In GoBubble you can be friends with any other pupil at your school.

You can also make new friends the same year group age around the World

In the app you click on “friends” and then use the map to search for new friends the same year group age. You then send them an invite and if they connect you’re now friends.

You’re safe in the knowledge everyone in GoBubble is trusted and verified – weird strangers are not allowed!

What types of messages (bubbles) can I create?

Every user can create text and emoji bubbles for free. You can also have great fun creating photo bubbles with filters or film bubbles in the app – to unlock these costs only 99p (to help cover our increased server and moderation costs).

If you have any other questions about GoBubble please see Miss Harrison or one of our fantastic eCadets.

We are looking forward to learning how to use social media safely!

GoBubble from Eyton School

IN ONLINE SAFETY
EDUCATION FOR
PRIMARY SCHOOL**

Why use Go Bubble?

The majority of children use social media before they are old enough. Research shows children “value social networks as a way of connecting with friends and family, maintaining their networks of friends and long distance connections”.

Increasing anecdotal evidence also indicates the benefits to learning, by children being able to share their work outside the classroom for peer feedback. We wanted to give children the opportunity to benefit from all the good social media can bring, by reducing the risks of inappropriate contact and content. We also wanted to provide teachers with a safe secure way to connect and collaborate with other classrooms around the World.

The team behind GoBubble,

eCadets, is the UK’s leading Innovator in online safety for children. Their founder, Henry, is a former Police Sergeant and with their team of experts they have ensured GoBubble doesn’t contain the same risks as other social platforms. This is because:

- a. Schools create accounts for the children, meaning every user is verified
- b. Children can chat with everyone at their own school or only children the same year group age equivalent if they’re at other schools
- c. All content is moderated before it appears. Our proprietary right Artificial Intelligence moderation platform (Luca) flags words, images and sounds against our 2300 watch words. The amber and red words are then checked by our live moderation team. If they agree the content shouldn’t appear the school (in red cases) and parents (in red and amber cases) are notified through the site.

FAQ

How old do you need to be to use Go Bubble?

GoBubble is for any child under 13. Parents can have access too however they cannot see any details or content from any child (except their own).

How much does it cost?

GoBubble is free to register. The app is free to download for everyone forever. There is an optional monthly in app purchase to unlock creating photo and film messages (which is only 99p per household).
